Java Backend Developer | Spring Boot | Microservices | Azure

Summary

Java Backend Developer with 2+ years of experience developing enterprise banking applications using Java, Spring Boot, Microservices, REST APIs, Spring Data JPA, and SQL. Experienced with Docker, Azure DevOps, CI/CD, testing, API integration, and production troubleshooting, with hands-on cloud and observability experience through production-oriented projects.

Experience

Java Full Stack Developer May 2024 – Present
Tata Consultancy Services *Mumbai, India*

- Develop and maintain enterprise features for a mortgage loan processing platform using Java, Spring Boot, React, and MySQL.
- Design and enhance REST APIs and backend services using Spring Boot, supporting business workflows and integrations across multiple application components.
- Implement data-access layers using Spring Data JPA, Hibernate, and MySQL, and troubleshoot application, database, and API integration issues.
- Containerize application services with Docker and work with Azure DevOps CI/CD pipelines for build and deployment workflows.
- Write JUnit tests, debug defects, and collaborate with QA and development teams to deliver and support features through Agile sprint cycles.

Technical Skills

Languages: Java, SQL, JavaScript
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JUnit
Architecture: Microservices, REST APIs, Event-Driven Architecture
Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, Kubernetes, Azure Kubernetes Service (AKS), Terraform, GitHub Actions
Observability & Messaging: OpenTelemetry, Prometheus, Grafana, Apache Kafka, Redis
Databases: MySQL, PostgreSQL
Tools: Git, Maven, Postman
Frontend: React

Certifications

Microsoft Certified: Azure AI Cloud Developer Associate (AI-200) *Microsoft*
Microsoft — Successor to Azure Developer Associate (AZ-204)

Microsoft Certified: Azure Fundamentals (AZ-900) *Microsoft*

Projects

IncidentIQ – Cloud Incident Management & AI RCA Platform 2026

- Built a production-style cloud incident management platform using Spring Boot and React that ingests application alerts and telemetry to automatically create, classify, assign, and track incidents throughout their lifecycle.
- Developed event-driven Spring Boot services for incident management, severity classification, acknowledgment, service-health tracking, incident timelines, and MTTR tracking using Apache Kafka, PostgreSQL, and Redis.
- Integrated OpenTelemetry, Prometheus, and Grafana to collect telemetry, monitor service health, visualize operational metrics, and support incident investigation.
- Implemented an AI-assisted Root Cause Analysis pipeline that analyzes incident context and application logs to generate failure summaries, possible root causes, and recommended remediation steps.
- Containerized services using Docker and implemented cloud deployment workflows with Kubernetes, Azure Kubernetes Service, Terraform, and GitHub Actions CI/CD.

Education

Master of Computer Applications (MCA) 2021 – 2023
ABES Engineering College *Uttar Pradesh, India*
Bachelor of Computer Applications (BCA) 2017 – 2020
Institute of Technology and Science *Ghaziabad, Uttar Pradesh*
